

Racing 10W50

Description

Stirlings racing 10W-50 A synthetic engine oil based on carefully selected high quality synthetic base oils, all of which already have a natural, high viscosity index and which advanced and well balanced additives in order to obtain the following properties:

- a very low tendency to evaporation
- a high and very stable viscosity index
- a good resistance against shearing
- a high resistance against aging
- a safe lubrication film at low and very high temperatures
- a very good detergency and dispersion power
- a very strong protection against wear, corrosion and foaming.

Application

A synthetic engine oil, designed for cars for race conditions where the highest performance is required. This oil has proven its quality under the most extreme conditions particularly in races.
